

2022 Carolinas Women in Computing Conference

CWIC is a leadership and professional development conference designed to bring together undergraduate and graduate students, faculty, researchers, and industry professionals in computing.

The goal of CWIC is to encourage the participation of women in computing by providing professional and social support. The conference will feature talks and panels by highly successful technical women. Undergraduate and graduate students are invited to participate through poster presentations, lightning talks or focused panels. Perhaps, more importantly, it is an opportunity to network with successful technical women from academia, government, and industry, and fellow students. A career fair with some local and regional companies will be included in the event. CWIC is affiliated with ACM-W.

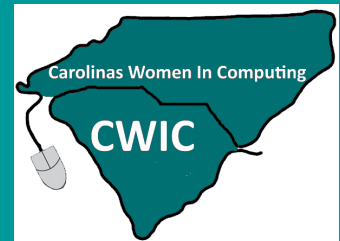

On April 8-9, 2022, the 2022 CWIC conference will be held at the University of North Carolina Wilmington main campus, hosted by the Department of Computer Science, the Program in Information Technology, and the Digital Arts Program.
